## EDUCATION

| Degree/Certificate | Institute/Board                        | CGPA/Percentage | Year    |
|--------------------|----------------------------------------|-----------------|---------|
| B.Tech             | Indian Institute of Technology Jodhpur | 6.93            | 2020-24 |
| Senior Secondary   | Kendriya Vidyalaya No.2 Sagar          | 84.60%          | 2019    |
| Secondary          | Christ Convent School Rehli            | 89.30%          | 2017    |

## EXPERIENCE

- Medront** July 2024 - Present  
Associate Product Manager Remote
  - Spearheaded the development of an AI-powered product recommendation engine, resulting in a 28% increase in cross-sell revenue and improving customer satisfaction scores by 15%.
  - Implemented an agile product development framework, reducing time-to-market by 40% and increasing team productivity by 25% through improved collaboration and iterative processes.
- Black Tulip** May 2022 - June 2022  
Web Development Intern Remote
  - Developed and implemented a cutting-edge frontend solution using HTML, CSS, Bootstrap, and React; optimized website performance resulting in a 40% decrease in page load time and a 25% increase in user engagement metrics.

## PROJECTS

- Yatra Sathi Travel Tech** April 2025- May 2025  
Figma, Excel, UI/UX
  - Designed and implemented Group Travel features for a tech-based travel platform, enabling flexible date selection and multi-user trip planning to enhance user convenience and booking efficiency.
  - Developed end-to-end UI/UX solutions using Figma, including user flows, wireframes, and high-fidelity prototypes, ensuring intuitive navigation and seamless user experience across devices.
- Health & Glow Product Teardown** Feb 2025- March 2025
  - Led a detailed product teardown for Health Glow, examining user journey, feature set and competitive landscape to identify key differentiators and area for improvement.
  - Utilized user feedback to provide actionable recommendations that can enhance user experience and personalisation.
- Credit Card Approval** Nov 2024- Dec 2024  
Pandas, NumPy, Scikit-learn
  - Designed a comprehensive predictive analytics solution that incorporated mean imputation for missing numerical values alongside mode imputation for categorical variables; streamlined processes led to reducing data preparation time by 30 hours per project cycle.
  - Developed a predictive model assessing credit card approval likelihood based on factors such as age, gender, income level, and existing debt; achieved an accuracy improvement of 15% through systematic data preprocessing techniques.
