EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech	Indian Institute of Technology Jodhpur	6.93	2020-24
Senior Secondary	Kendriya Vidyalaya No.2 Sagar	84.60%	2019
Secondary	Christ Convent School Rehli	89.30%	2017

EXPERIENCE

- Medront** July 2024 - Nov 2024
Product Management Intern Remote
 - Spearheaded the development of an AI-powered product recommendation engine, resulting in a 28% increase in cross-sell revenue and improving customer satisfaction scores by 15%.
 - Implemented an agile product development framework, reducing time-to-market by 40% and increasing team productivity by 25% through improved collaboration and iterative processes.
- Black Tulip** May 2022 - June 2022
Web Development Intern Remote
 - Developed and implemented a cutting-edge frontend solution using HTML, CSS, Bootstrap, and React; optimized website performance resulting in a 40% decrease in page load time and a 25% increase in user engagement metrics.

PROJECTS

- Health & Glow Product Teardown** Feb 2024- March 2024
 - Led a detailed product teardown for Health Glow, examining user journey, feature set and competitive landscape to identify key differentiators and area for improvement.
 - Utilized user feedback to provide actionable recommendations that can enhance user experience and personalisation.
- Costco Sales Analysis** Dec 2023- Jan 2024
Excel, Pivot Table, VLOOKUP, SUMIF, Visualisation
 - Created visual representations using multi-layered charts that highlighted key performance indicators, leading to the identification of three critical trends influencing customer purchasing behavior within a two-month period.
- Credit Card Approval** Nov 2023- Dec 2023
Pandas, NumPy, Scikit-learn
 - Designed a comprehensive predictive analytics solution that incorporated mean imputation for missing numerical values alongside mode imputation for categorical variables; streamlined processes led to reducing data preparation time by 30 hours per project cycle.
 - Developed a predictive model assessing credit card approval likelihood based on factors such as age, gender, income level, and existing debt; achieved an accuracy improvement of 15% through systematic data preprocessing techniques.
